

Working Together to End This Pandemic

COVID-19 Huddle Messages

Please share the latest information about COVID-19 vaccines at huddles and unit-based team meetings.

COVID-19 vaccines are still important

- + Getting a COVID-19 vaccine is a big step toward safely returning to activities we have avoided for much of the pandemic — dining indoors at restaurants, gathering with family and friends, attending sporting events and traveling.
- + Available vaccines are effective against coronavirus variants that make up a growing number of the new COVID-19 cases.
- + Kaiser Permanente continues to administer vaccines in all regions. Learn how to get a vaccination appointment at kp.org/covidvaccine.
- + There are many people who still aren't vaccinated. So, continue taking precautions to prevent the spread of COVID-19: wear masks, practice physical distancing in public, avoid crowded indoor spaces and wash hands frequently.

Getting vaccinated: Children and teens

- + In May, the U.S. Food and Drug Administration authorized the use of the Pfizer-BioNTech COVID-19 vaccine for 12- to 15-year-olds.
- + Pfizer-BioNTech is the only COVID-19 vaccine approved for children younger than 18 at this time.
- + A parent or guardian must accompany anyone under 18 to their vaccine appointment. Medical staff may ask for the child's photo ID (such as a school ID card or passport) and proof of age before administering the vaccine.

QUESTIONS: For the latest COVID-19 vaccine information, visit kp.org/covidvaccine, or call the national KP COVID Vaccine InfoLine, available 24/7 in English and Spanish, at 855-550-0951.
