

AUGUST 2016

GIVE SAFETY A LIFT

LM^P LABOR MANAGEMENT
PARTNERSHIP

HELLO UBT HEALTH AND SAFETY CHAMPIONS,

Every voice deserves a lift. And every lift deserves a voice. As we wind down the rest of summer in August, please help shine a spotlight on safe lifting.

Many of us work in positions that may require moving objects or lifting and transporting people. Help your unit-based team members delve deeper into solutions for the lifting and mobility needs in your workplace.

Follow these easy steps*

1. Print page 2 of this flier, and post it in your breakroom or other employee area.
2. Encourage team members to tear off a small “ballot” and write-in their candidate for Riskiest Lift.
3. Collect the votes in envelope, Suggestion Box, or some other place that’s easy for team members to find.

At the end of the month, find which lift is the biggest concern for your UBT members. Discuss the top vote-getters at your next UBT meeting.

* **Not enough campaign funds for a full-scale operation?** Simply bring the flier to a huddle and get ideas on the spot. For larger teams, email the ballots and collect electronic answers.

VOTE HERE!

Do you lift any objects or people during your work? Are you worried you could be injured when lifting?

Tear off a “ballot” below and **VOTE NOW!** Write in your candidate for the type of lift you believe needs to be safer or creates the greatest risk of injury for your team members.

Cast your ballot by _____ before the polls close August 31.

(Fill in preferred method for collecting votes)

WHAT HAPPENS AFTER WE VOTE?

Let’s discuss the winners at a huddle or UBT meeting and take the next steps we need to make the ‘winning’ lifts safer.

We can minimize risk of injury to workers who lift objects or people by taking the load off workers bodies. You can help our team identify the right equipment and remove the barriers to using it consistently. This message is brought to you by your UBT Health and Safety Champion.
